

SYED SHUJA HAIDER SHARAZI

Senior .NET Developer | Backend & Business Applications

Pakistan | sharazi.shuja@gmail.com | [LinkedIn](#) | [GitHub](#) | [Upwork](#)

PROFESSIONAL SUMMARY

Senior .NET developer with 9+ years of software-development experience building, modernizing, maintaining, and supporting business applications. Primary experience includes C#, ASP.NET Core, Blazor, SQL Server, Entity Framework Core, Web APIs, and production support. Recent work is heavily focused on manufacturing systems spanning purchasing, HR, inventory, tool management, reporting, authentication, and shared ERP functionality. Experienced in legacy modernization, troubleshooting, deployments, stakeholder collaboration, and long-term ownership of business-critical applications.

CORE TECHNOLOGIES

Backend	C#, .NET, ASP.NET Core, ASP.NET MVC, Web API, REST APIs
Data	SQL Server, Entity Framework / EF Core, LINQ, Dapper, Database Design
Application	Blazor Server, WinForms, HTML, CSS, JavaScript, jQuery
Identity	ASP.NET Core Identity, OpenID Connect, OAuth 2.0, IdentityServer
Engineering	Git/GitHub, debugging, production support, performance troubleshooting, application deployment

PROFESSIONAL EXPERIENCE

Programming Assistant | CAMCO Manufacturing | Mar 2025 - Present | Contract | Remote

- Develop and maintain internal manufacturing applications using C#, Blazor, ASP.NET Core, SQL Server, Entity Framework Core, and Syncfusion.
- Migrated the legacy Microsoft Access purchasing application to Blazor and supported its production release; maintain and oversee the shared ERP platform used across internal applications.
- Investigate performance, memory, and production issues and work with stakeholders and developers on requirements, application changes, deployments, and SQL execution.

.NET Application Developer | CAMCO Manufacturing | Oct 2024 - Mar 2025 | Contract | Remote

- Returned as a remote .NET application developer through Upwork; completed pending HR application work and contributed to the shared ERP platform.
- Developed and maintained internal business applications, investigated defects, and supported production operations.

Programming Manager | .NET Developer Lead | CAMCO Manufacturing | Jul 2023 - Aug 2024 | Contract | Remote

- Managed development and support for internal manufacturing applications while continuing hands-on .NET development.
- Designed and built the shared ERP foundation, centralizing entity models, repositories, and business services into reusable .NET libraries distributed through an internal NuGet package.
- Coordinated requirements, developer collaboration, releases, deployments, SQL script execution, and production issue resolution.

.NET Developer | CAMCO Manufacturing | Jan 2021 - Jun 2023 | Contract | Remote

- Developed manufacturing applications using C#, ASP.NET Core, Blazor, SQL Server, Entity Framework Core, and Syncfusion.
- Migrated a legacy Microsoft Access HR system to Blazor and built centralized authentication adopted across multiple internal applications.
- Developed reporting and workflow features and contributed to Metrics and Stockroom functionality.

EARLIER EXPERIENCE

Senior .NET Developer | Markhor Technologies | Jul 2018 - Dec 2020 | Self-employed

- Delivered client .NET web-application work, primarily backend and database-driven functionality, business logic, integrations, maintenance, and enhancements.
- Worked with client requirements and other developers on tourism and business application projects.

Junior .NET Developer | Markhor Technologies | Mar 2017 - Jun 2018 | Self-employed

- Developed and maintained ASP.NET MVC applications using C# and SQL Server, implemented backend features, and resolved application defects.
- Worked on an apartment/compound management system and a GUI-based desktop application for Yukon.

Technical Support Engineer | Corporate Help Desk | Jazz / Business & Communication Systems | Dec 2014 - Feb 2017 | Full-time

- Provided technical support for enterprise connectivity services including fiber, wireless, VPN, monitoring, incident investigation, escalation, and technical communication.

SELECTED PROFESSIONAL PROJECTS

Purchasing Management Application: Migrated a legacy Microsoft Access purchasing system to Blazor Server; implemented purchase requests/orders, vendor workflows, quote attachments, status tracking, documents, reporting, shared ERP integration, and production support.

Shared .NET ERP Platform: Designed and built reusable shared entities, repositories, business services, and utilities distributed through an internal NuGet package and used across multiple manufacturing applications.

ToolCrib - Maintenance & Performance: Maintain and improve an existing manufacturing application, resolving performance, memory, production, and workflow issues around tools, gages, inventory movements, calibration, and reporting.

Centralized Authentication System: Built shared authentication with ASP.NET Core Identity, IdentityServer, OpenID Connect, OAuth 2.0, users/roles, claims, password reset, employee validation, login auditing, and refresh-token support.

Human Resources Portal: Migrated a legacy Access HR system to Blazor, supporting employee records, hiring, leave, training, compliance, reporting, and related HR workflows.

Manufacturing Metrics & Reporting: Developed and maintained operational metrics and reporting features, translating stakeholder reporting requirements into production application functionality.

FREELANCE / REMOTE PROFILE
